events.md

Upcoming Events System Plan & Workflow

Overview

The Upcoming Events system should be designed as a scalable event management platform that supports:

- Event discovery and promotion
- Detailed event presentation
- Secure participant registration
- Sponsorship acquisition and payment
- Admin event management
- Analytics and reporting
- Spam prevention and moderation
- Mobile responsiveness
- Future scalability for paid events, livestreams, certificates, and ticketing

The workflow must be simple for visitors while giving administrators full control.

---

1. MAIN UPCOMING EVENTS PAGE

Purpose

This page acts as the event discovery hub where users can browse all upcoming events in preview mode.

Main Features

Event Preview Cards

Each event should display:

- Event featured image/banner
- Event title
- Short event summary
- Event category/type
- Event date
- Event location
- Countdown timer (optional but recommended)
- “VIEW MORE ABOUT EVENT” button
- Clickable image that redirects to full event page

Recommended Layout

Hero Section

- Large promotional banner
- Featured upcoming event spotlight
- CTA buttons:
- Register Now
- Become a Sponsor
- View Upcoming Events

Events Listing Section

Support:

- Grid view
- List view
- Filtering
- Search functionality

Recommended Filters

- Event type
- Date
- Physical / Virtual / Hybrid
- Category
- Location

Additional Recommended Sections

Past Events Section

- Event recap images/videos
- Testimonials
- Attendance statistics

Newsletter Subscription

Allow users to subscribe for:

- Upcoming event notifications
- Sponsor opportunities
- Event reminders

---

2. INDIVIDUAL EVENT DETAILS PAGE

Purpose

The dedicated event page provides complete information about the selected event.

Event Page Structure

A. Event Hero Section

Should contain:

- Event flyer/banner
- Event title
- Date & time
- Event venue/location
- Google Maps integration
- Event type (Physical / Virtual / Hybrid)
- Register button
- Share buttons (LinkedIn, Facebook, X, WhatsApp)

B. Event Details Section

Include:

- Full event description
- Event objectives
- Expected outcomes
- Event agenda/schedule
- Topics to be discussed
- Target audience

C. Why Attend Section

Suggested Points

- Networking opportunities
- Industry insights
- Access to keynote speakers
- Career/business opportunities
- Partnership opportunities

- Learning & certifications
- Brand exposure

D. Keynote Speakers Section

Each Speaker Should Include:

- Professional photo
- Full name
- Position/title
- Company/organization
- Short biography
- Social links (optional)

Recommended Features

- Speaker profile modal popup
- Featured keynote speaker highlight

E. Event Gallery Section (Optional)

- Previous event photos
- Promotional videos
- Event teaser clips

F. Registration Section

Participant Registration Requirements

Registration Should Be:

- Free
- Secure
- Spam-protected
- Easy to complete
- Mobile-friendly

Recommended Registration Fields

Basic Details

- Full Name
- Email Address
- Phone Number
- Company/Organization
- Job Title
- Country
- City
- LinkedIn Profile (optional)

Additional Fields

- How did you hear about the event?
- Areas of interest
- Questions for speakers
- Dietary requirements (if physical event)
- Consent checkbox for communications

Security & Anti-Spam Protection

Mandatory Recommendations

1. CAPTCHA Protection

Use:

- Google reCAPTCHA v3 OR
- Cloudflare Turnstile (recommended)

2. Email Verification

After registration:

- Send OTP or verification email
- Confirm registration only after verification

3. Duplicate Registration Prevention

Prevent:

- Duplicate email registrations
- Duplicate phone number registrations

4. Rate Limiting

Protect forms from:

- Bot submissions
- Abuse attacks

5. Honeypot Fields

Invisible anti-bot fields for additional protection.

6. Admin Approval (Optional)

Allow manual approval for suspicious registrations.

Registration Workflow

User Flow

1. User opens event page
2. Clicks Register
3. Completes form
4. Passes CAPTCHA validation
5. Verifies email
6. Receives confirmation email
7. Receives QR code or attendee ID
8. Admin dashboard records registration

Confirmation System

Automatic Emails

User Receives:

- Registration confirmation
- Event details

- Calendar invite
- QR code/check-in pass
- Reminder emails

Admin Receives:

- New registration alert
- Daily registration summary

---

3. SPONSORSHIP SYSTEM

Purpose

Allow companies and organizations to sponsor events directly from the website.

Sponsorship Section Structure

Sponsorship Packages Display

Use professional pricing cards/tables.

GOLD SPONSOR — ₦6,000,000

Benefits

- Title sponsor recognition
- Premium branding
- Keynote speaking slot
- Front cover advert placement
- Full-page brochure advert
- Exhibition booth
- Brand activation
- 6 VIP passes

SILVER SPONSOR — ₦4,000,000

Benefits

- Logo visibility
- Panel speaking opportunity

- Exhibition booth
- Full advert page in brochure
- 4 event passes

BRONZE SPONSOR — ₦3,000,000

Benefits

- Logo placement
- Shared display branding
- Half-page brochure advert
- 2 event passes

OFFICIAL PARTNER — ₦2,500,000

Benefits

- Partner recognition
- Certificate award
- Media mentions

GENERAL PARTNER — ₦1,500,000

Benefits

- Vendor booth access

Sponsorship Registration Workflow

Sponsor Flow

1. Sponsor selects package
2. Completes sponsorship form
3. Uploads company information
4. Uploads logo/materials
5. Proceeds to payment
6. Receives invoice & confirmation
7. Admin reviews submission
8. Sponsor status activated

Sponsor Form Fields

Company Information

- Company name
- Contact person
- Email
- Phone number
- Company website
- Industry
- Company description

Sponsorship Details

- Selected package
- Additional requests
- Logo upload
- Promotional material upload

Payment Integration

Recommended Payment Gateways

- Paystack
- Flutterwave
- Stripe (for international sponsors)

Features

- Secure payment processing
- Invoice generation
- Payment confirmation emails
- Sponsorship receipt
- Failed payment recovery

Sponsor Dashboard Features

Sponsors should optionally have:

- Sponsorship status
- Payment history

- Uploaded assets
- Invoice downloads
- Event communication updates

---

4. ADMIN DASHBOARD SYSTEM

Purpose

Centralized management system for all events and registrations.

Admin Dashboard Features

Event Management

Admins should be able to:

- Create events
- Edit events
- Delete events
- Publish/unpublish events
- Schedule events
- Feature events

Registration Management

Features

- View registrations
- Search/filter attendees
- Export registrations (CSV/Excel)
- Approve/reject attendees
- Send bulk emails
- Attendance tracking
- QR code scanning/check-in

Sponsor Management

Features

- View sponsors
- Track sponsorship payments
- Approve sponsorships
- Manage sponsor assets
- Download sponsor reports

Analytics Dashboard

Recommended Metrics

- Total registrations
- Registration trends
- Sponsor revenue
- Event traffic
- Conversion rates
- Most viewed events
- Email engagement

---

5. USER EXPERIENCE (UX) RECOMMENDATIONS

Mobile First Design

The entire event workflow must work perfectly on:

- Mobile
- Tablet
- Desktop

Performance Optimization

- Lazy-load images
- CDN optimization
- Fast page speed
- Optimized media uploads

Accessibility

Ensure:

- Keyboard navigation
- Screen reader support
- Proper contrast ratios
- Alt text for images

---

6. SEO & MARKETING FEATURES

SEO Requirements

Each event should support:

- Custom meta title
- Meta description
- Open Graph sharing image
- Structured event schema

Social Sharing Features

Allow users to:

- Share events directly
- Add events to calendar
- Copy event links

---

7. EMAIL & NOTIFICATION SYSTEM

Automated Notifications

Event Reminder Emails

Send:

- 7 days before
- 3 days before
- 1 day before
- Event starting reminder

Admin Notifications

Notify admins for:

- New registrations
- New sponsors
- Payment success/failure
- High traffic spikes

---

8. FUTURE SCALABILITY FEATURES

The system should be built to support future additions such as:

- Paid ticketing
- VIP ticket categories
- Virtual event livestreams
- Webinar integrations
- Certificate generation
- Badge printing
- Networking lounges
- AI matchmaking
- Event mobile app
- SMS reminders
- Multi-language support

---

9. RECOMMENDED TECHNICAL ARCHITECTURE

Frontend

- Responsive modern UI
- Fast loading
- SEO optimized

Backend

- Secure authentication
- REST API or GraphQL
- Role-based access control

Database

Store:

- Events
- Registrations
- Sponsors
- Payments
- Speakers
- Media

---

10. RECOMMENDED USER ROLES

Super Admin

Full access to everything.

Event Manager

Can manage events and registrations.

Sponsor Manager

Handles sponsorships and payments.

Content Manager

Manages event content/media.

---

11. RECOMMENDED EVENT STATUS SYSTEM

Events should support statuses:

- Draft
- Published
- Upcoming
- Ongoing
- Completed
- Cancelled
- Archived

---

12. CHECK-IN & ATTENDANCE SYSTEM (HIGHLY RECOMMENDED)

Features

- QR code attendee check-in
- Manual check-in
- Attendance reports
- Badge verification

This becomes extremely valuable as events grow.

---

13. SECURITY REQUIREMENTS

Mandatory Security Practices

- HTTPS everywhere
- Secure payment processing
- Input sanitization
- CSRF protection
- XSS protection
- Database validation
- File upload restrictions
- Admin activity logs
- Backup & recovery system

---

14. SUGGESTED EVENT PAGE FLOW

Visitor Journey

Discovery

Homepage → Upcoming Events

Engagement

Preview card → Event details page

Conversion

Register / Sponsor

Confirmation

Email + reminders

Event Day

QR check-in → Attendance tracking

Post Event

Feedback collection → Follow-up email

---

15. POST-EVENT FEATURES (IMPORTANT)

After Event

Collect:

- Feedback forms
- Ratings
- Testimonials
- Survey responses

Post Event Content

- Upload recordings
- Upload photos
- Publish recap article
- Share sponsor appreciation
- Generate attendance reports

---

16. RECOMMENDED PRIORITY IMPLEMENTATION

Phase 1 — Core MVP

- Events listing
- Event details page

- Participant registration
- Admin dashboard
- Basic sponsorship system

Phase 2 — Enhanced Experience

- QR check-in
- Email automation
- Analytics
- Sponsor portal

Phase 3 — Advanced Features

- Mobile app
- Livestreaming
- AI networking
- Certificates
- Advanced analytics

Final Recommendation

The event system should be designed like a professional conference management platform rather than just a simple events page.

The key success factors are:

- Smooth registration workflow
- Strong anti-spam protection
- Easy admin management
- Professional sponsorship handling
- Mobile-first experience
- Fast performance
- Scalability for future growth

The architecture should prioritize reliability, security, and conversion optimization from the beginning.
